Web3Build Studio

FREE CRYPTO PREDICTION GAME · TELEGRAM MINI APP + BOT

Call It

Will BTC be higher in an hour? Players call UP or DOWN on BTC, ETH, SOL and TON every hour, build streaks, climb leaderboards and a 30-tier season, and win partner vouchers. Free to play, points only.

Custom design included · Hourly UP / DOWN · Measured exchange prices · Streaks & leaderboards · Group leagues · 6 languages

Try it live in Telegram **t.me/CryptoPredictPricebot**

The running Call It Mini App. Players and prices are test data.

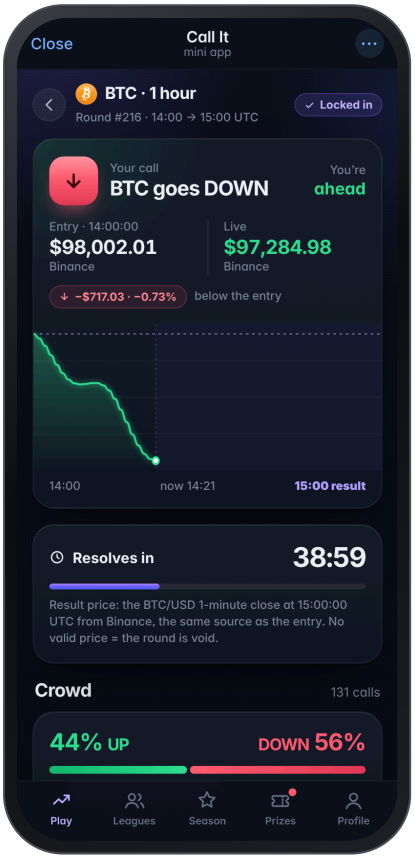
Product sheet
Software by Web3Build Studio · web3buildstudio.com/exchange-telegram-bots

Points only: nothing is bought, staked or cashed out. Not financial advice.

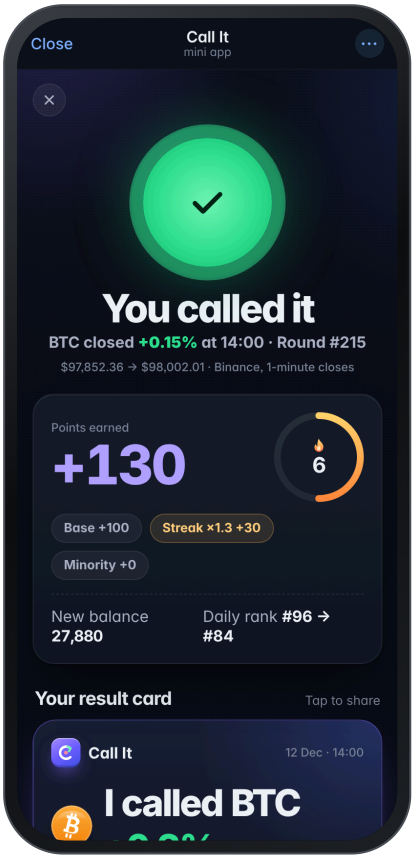
HOW IT PLAYS

One question an hour. Easy to start, hard to stop.

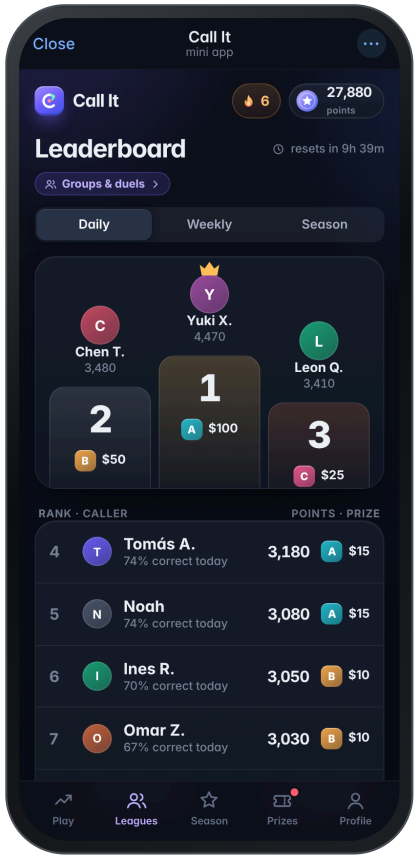
Each round asks whether a coin closes higher at the end of the hour than at the start. Calls close before the reference price exists, so nobody can see it before calling.



A round · your call, live price, crowd split



Result · points, streak, share card



Daily, weekly and season boards

Scoring

100 points for a right call. From a streak of 3 each right call earns +0.1× more, up to ×2. A wrong call scores nothing; a void keeps the streak.

Minority bonus

Right while under 40% of a crowd of 10+ called the same way: +60 points. Contrarians get rewarded.

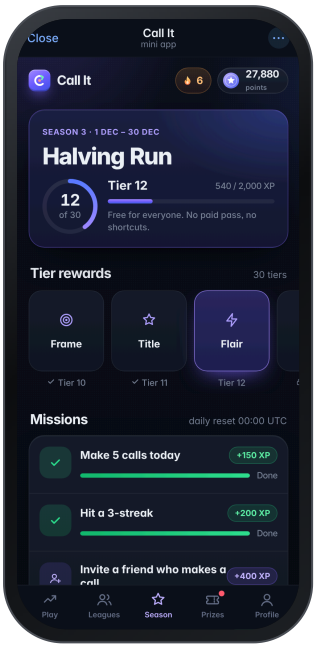
Coin of the day

An optional extra market with a higher points multiplier (1.5×, 2× or 3×), set in the admin.

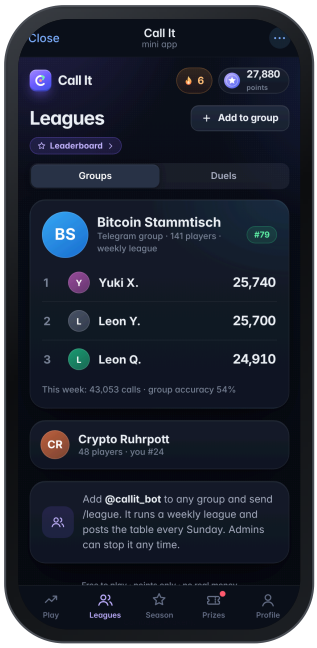
Example data · test players, prices and partner names are placeholders.

ENGAGEMENT

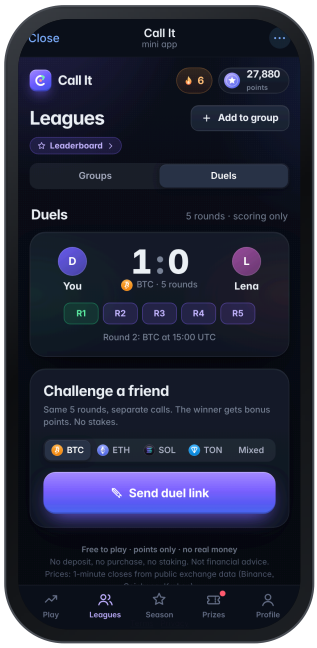
Seasons, leagues and duels.



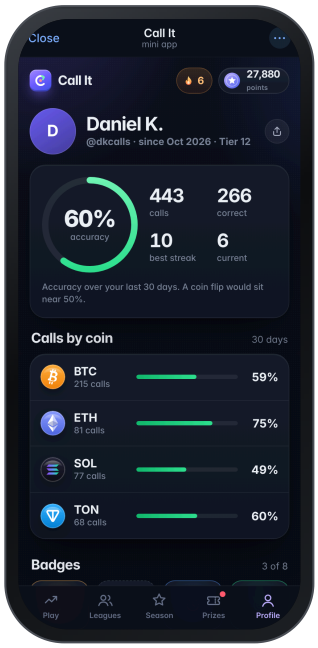
30-tier season, missions



Group leagues



Duels · 5 rounds



Profile · accuracy, badges

Season pass

30-day seasons, 30 tiers unlocked by XP from calls, right calls and missions. Free track for everyone, no paid pass. Tier rewards can be partner vouchers.

Daily missions

Make 5 calls, hit a 3-streak, call 2 coins, play 7 days in a row, invite a friend who makes a call.

Group leagues

Add the bot to a Telegram group and send /league: a weekly group table, posted in the group every Sunday.

Duels

A link challenge: the same 5 rounds, separate calls. The winner gets bonus points; no stake, nothing changes hands.

Share cards

A result card image (“I called BTC +0.15%”) with a link back to the bot: free word of mouth.

Reminders, opt-in

Round results and a once-a-day streak reminder, only to players who opted in and never in their quiet hours.

Six languages: English, German, Russian, Spanish, Turkish, Persian. A daily call cap (default 30) and a personal lower limit keep play light. **Example data** · test players, prices and partner names are placeholders.

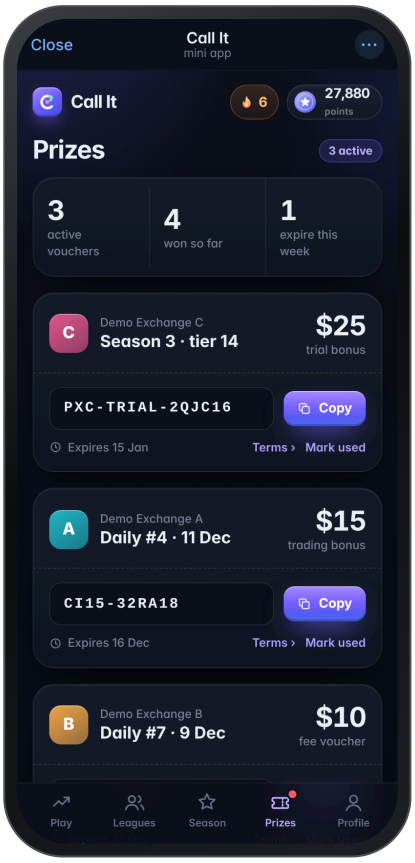
FOR EXCHANGES, COMMUNITIES AND SPONSORS

Prizes that bring traders to you.

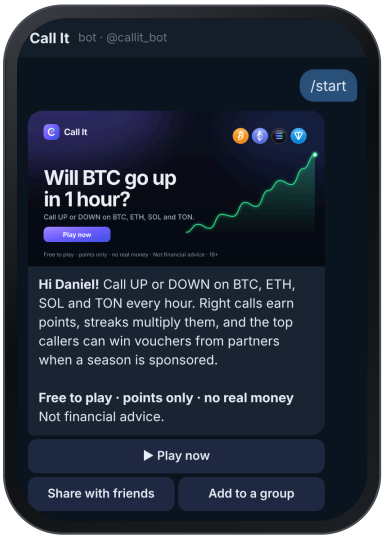
- **Partner voucher pools.** A partner adds codes (one per line) with a value and label, e.g. “$25 trading-fee voucher”, an expiry and a terms link.
- **Prizes by rank** for the day, the week and the season, and **prizes per season tier**, each taken from a pool.
- Codes are shown **only to the player who won them**, never on share cards or in admin lists. An empty pool shows no prize.
- **Sponsor a season**: a contact link for brands that want their name on the next season.
- Group leagues put your bot in front of existing crypto communities.

Why it works for an exchange

Players think about price every hour, inside Telegram, with your name on the prizes. A voucher is redeemed on your exchange, which is where the next trade happens.



Prizes · vouchers won, with copy and terms



The bot’s /start answer. **Example data**

The bot answers /start with its welcome card and buttons to play, share and add it to a group. In groups it answers /league and /standings and posts the weekly table.

FAIRNESS & SAFETY

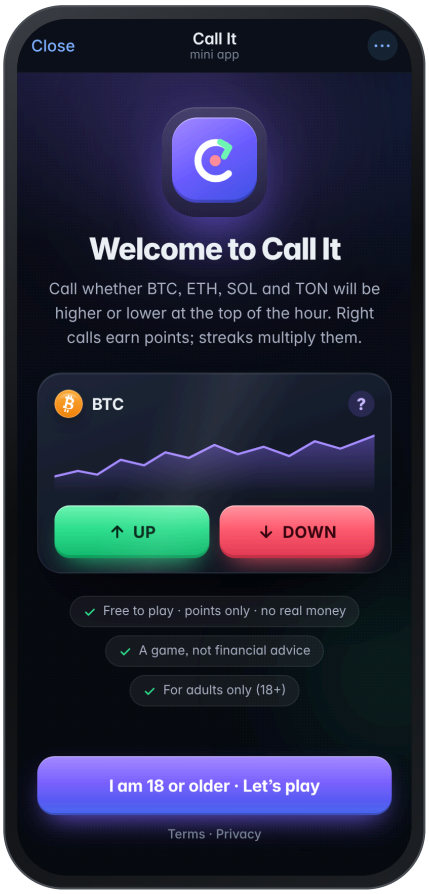
Every price is measured, stored and checkable.

Prices from public exchange data

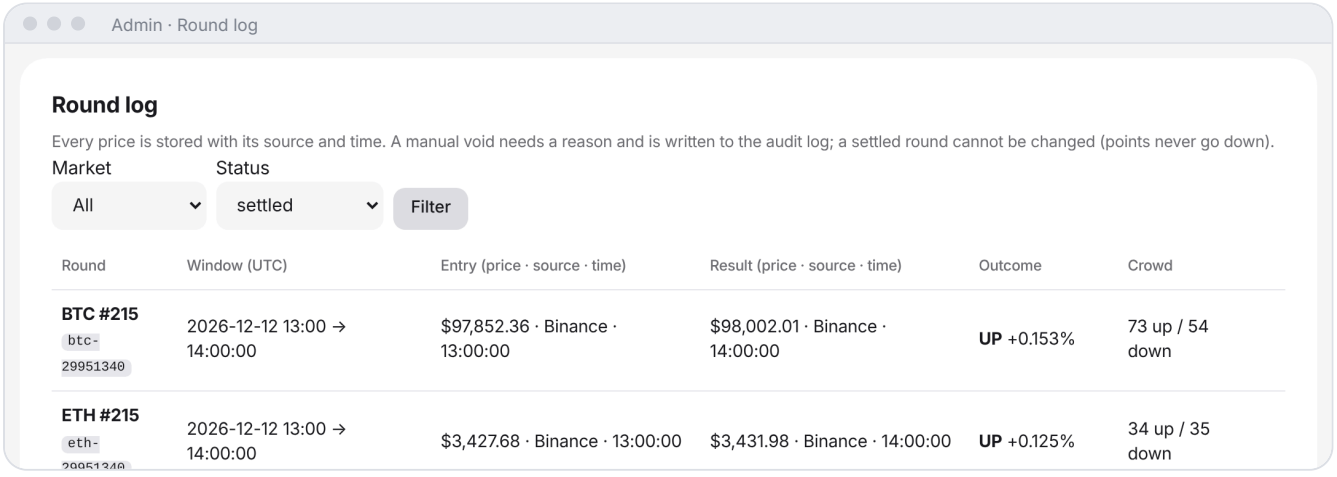
- The reference and result prices are the **closes of 1-minute candles** from Binance, Coinbase and Kraken public market data, read by the server, never sent by a player.
- **Cross-check**: when several sources answer, one more than 2% from their median is dropped; with exactly two that disagree, nothing is chosen.
- Settlement uses the **same source** as the entry; another source only when it has both candles and agrees with the recorded entry.
- No valid price, or an exactly flat close: the round is **void** (no points, streak kept). Nothing is interpolated or guessed.
- Every round stores both prices with source and time; a manual void needs a reason and is logged. Settled rounds cannot be changed.

Players protected

- Free to play: points only, no purchase, no stake, no cash-out. 18+ confirmation on first open.
- Every API call carries Telegram's initData, **verified with the bot token**.
- Referral fraud checks on hashed IP, subnet and device signals only (90 days); a friend counts only if their invite is counted and they made a call.



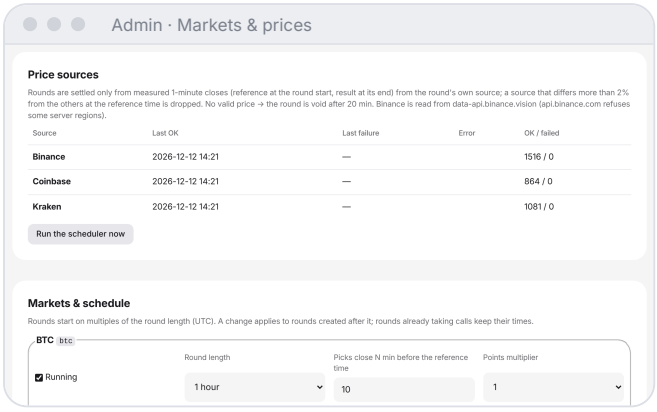
Welcome · 18+ and "not financial advice"



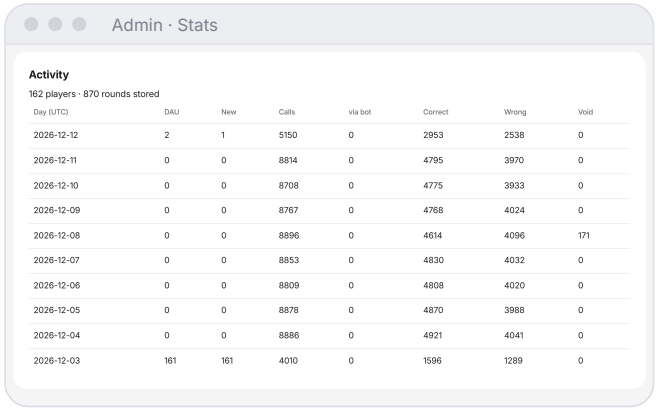
Entry and result price with source and time for every round. **Example data**

FOR THE OPERATOR

Markets, rules, prizes, players.



Source health and the schedule per market. **Example data**



Daily actives, new players, calls, right / wrong / void. **Example data**

Markets

Turn coins on or off, round length from 15 minutes to a day, when picks close, points multiplier, price sources and pairs per market.

Game rules

Daily call cap, minority threshold, quiet hours, maximum source deviation, settle grace period, duel bonus.

Season & prizes

Season number, start and length, XP per tier, prizes by rank and per tier from partner pools.

Partners & pools

Partners with name, link and colour; voucher pools with codes left, issued and expiry.

Players & fraud

Search, accuracy, streaks, vouchers; pause a player; riskiest referral clusters.

Audit log

Every admin change and manual void, with who and when.

1. **Create the bot**
   In @BotFather; paste the token in the admin and press Connect (webhook, commands, menu button). Optional: its own domain.
2. **Pick markets and the season**
   BTC, ETH, SOL and TON are set up; add a coin of the day and the season dates.
3. **Add partner vouchers**
   Partners, pools and codes; assign them to ranks and tiers.

WHAT YOU GET

- **Custom design included**: your brand, colours, logo, domain and screens, designed for you in every build.
- **Measured prices** from three public sources with cross-checks.
- **Partner voucher pools** by rank and tier.
- **Share cards** and opt-in reminders.
- **Telegram bot + Mini App** in 6 languages.
- **Leaderboards, season pass, missions, duels, group leagues.**
- **Admin** with round log, stats, players, fraud and audit.
