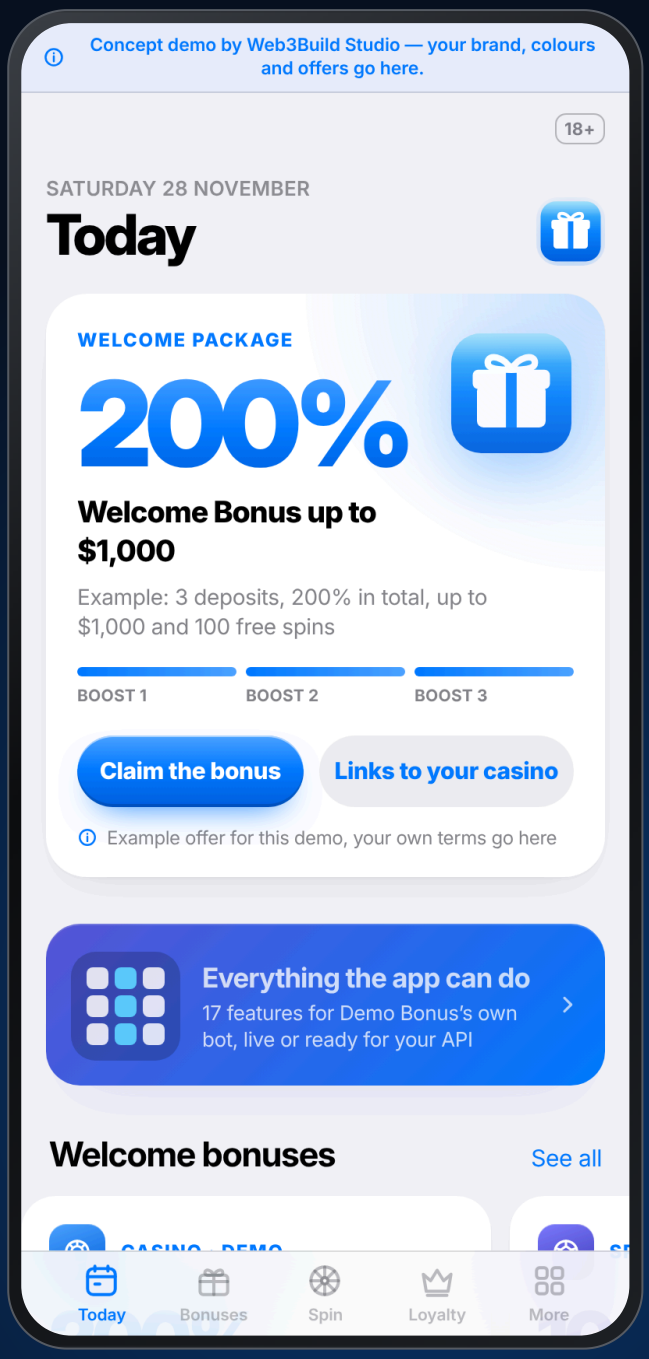
WHITE-LABEL TELEGRAM BOT + MINI APP

Casino Bonus Bot

Your own bonus bot inside Telegram: offers, a daily wheel, loyalty, check-ins and invites in your brand, with fraud checks and responsible-gambling guardrails built in.

Custom design included · Your brand & colours · Telegram Mini App · Fraud detection · Operator panel · 18+ gate

Try it live in Telegram t.me/Demovipbonusbot



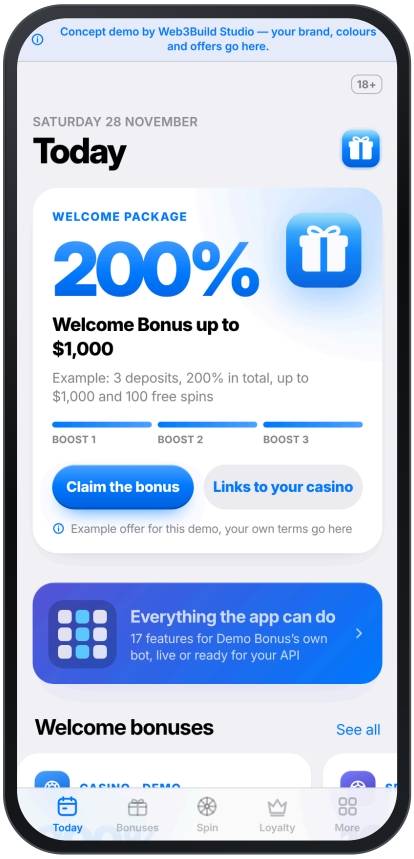
Live showcase "Demo Bonus", open to anyone in Telegram. Brand, colours and offers are placeholders.

For licensed operators. 18+ · Play responsibly.

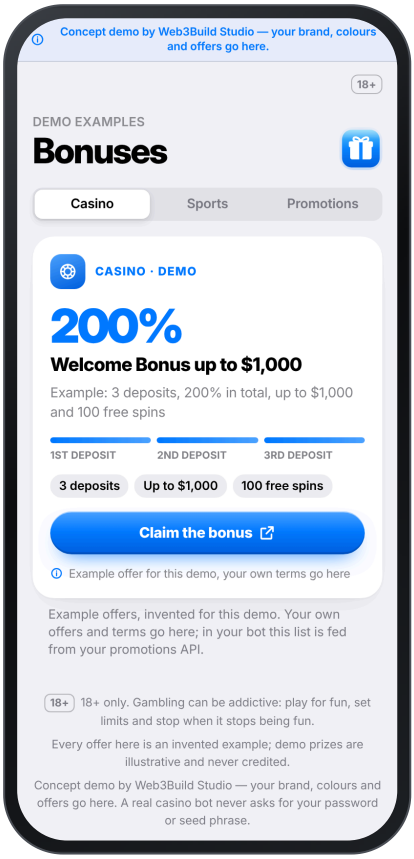
WHAT IT DOES

Your casino, one tap away in Telegram.

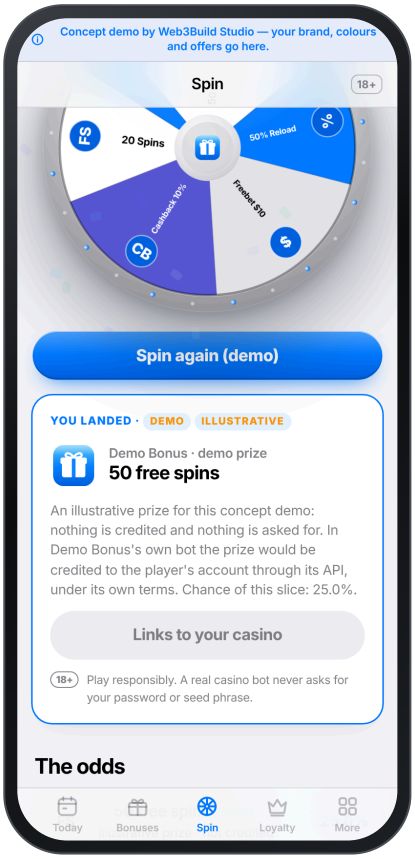
Players open a bot, tap one button and land in a Mini App in your colours: today's offers, every bonus with its terms, a free daily wheel and their loyalty tier. Links go only to your official site.



Today · offers of the day



Bonuses · casino, sports, promotions



Daily wheel · server-drawn, odds shown

Bonus feed

Welcome packages, reloads and promotions with terms, wagering and expiry. Tabs for casino, sports and promotions.

Daily wheel

One free spin a day. The server draws the result and the page lists the chance of every slice.

Official links only

A Safety screen names your official site and what a real casino never asks for in a bot.

Demo data · live showcase, invented brand and offers. Screens are 390 px phone captures of the running demo.

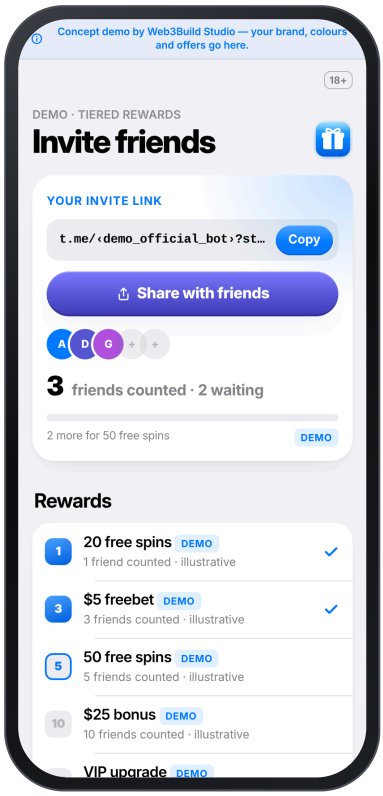
ENGAGEMENT

Reasons to come back every day.

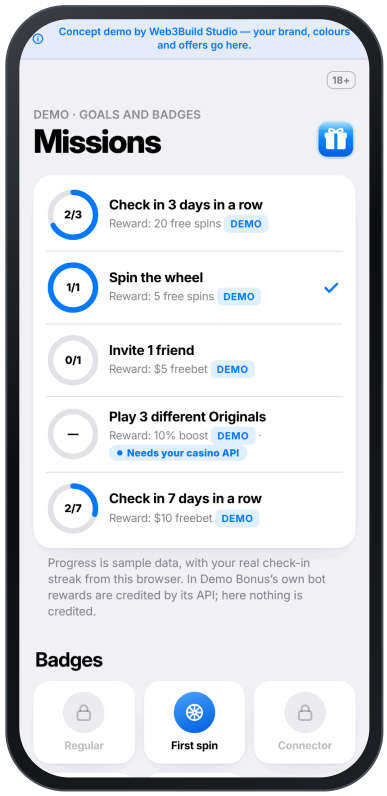
- **Loyalty tier card.** Tier, points to the next tier and perks such as a personal account manager or weekly cashback.
- **Daily check-in streak.** A 7-day strip with milestone rewards at day 3, 7 and 30.
- **Invite friends.** A personal link, rewards by tiers of friends counted (1, 3, 5, 10, 25), shared from inside Telegram. A friend counts only after the fraud checks.
- **Missions and badges.** Daily goals with progress rings, badges and a weekly tournament leaderboard.
- **Promo calendar.** The week's promotions with a reminder an hour before.
- **Free sports prediction game.** Pick three results a week, no stake; the leaderboard winner gets a freebet.

17 features, each marked honestly

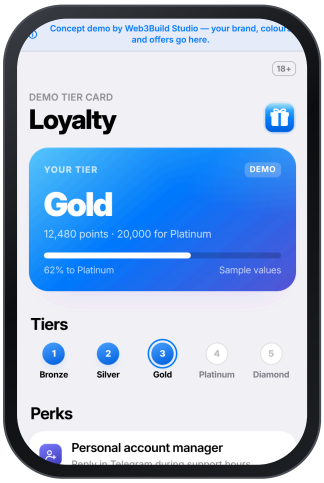
The demo's "All features" screen labels every feature: Live in this demo or Needs your casino API or Ready, needs your keys. Account linking, win-back offers, live withdrawal status, the VIP-manager line and loss cashback read data only your casino API has.



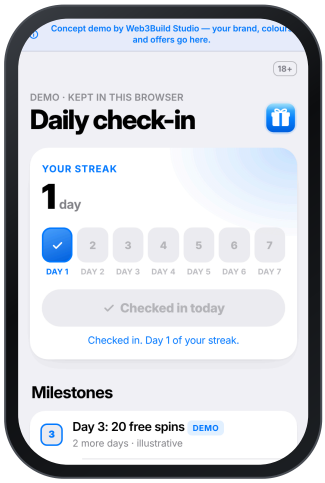
Invite tiers



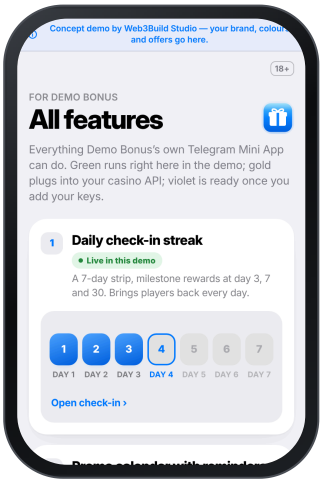
Missions & badges



Loyalty tier



Check-in streak



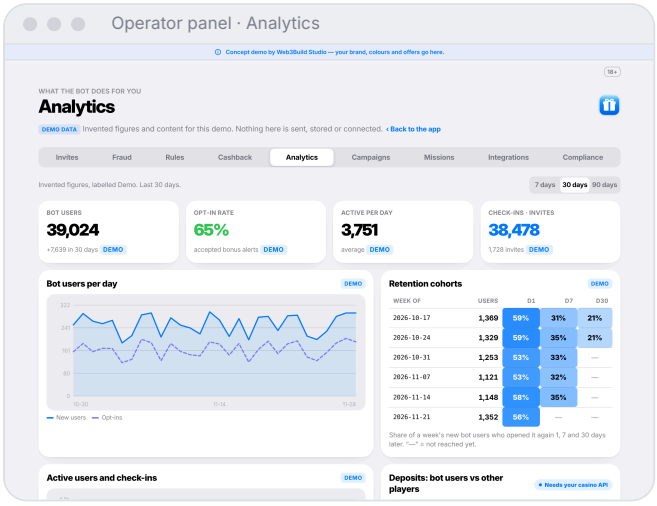
All features, with status

Demo data · live showcase, invented brand and offers. Every prize on these screens is an invented example labelled "Demo"; in your bot the rewards and their terms are yours and are credited by your casino.

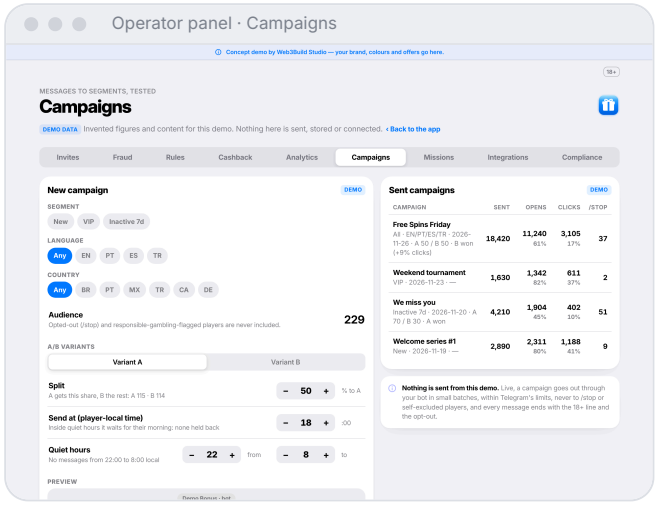
FOR THE OPERATOR

An operator panel, not a black box.

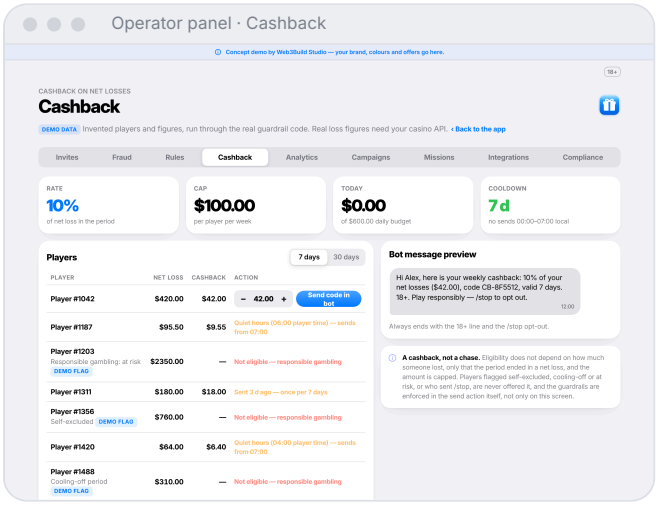
Analytics, campaigns, missions, integrations and compliance in one panel, next to the invite and fraud views.



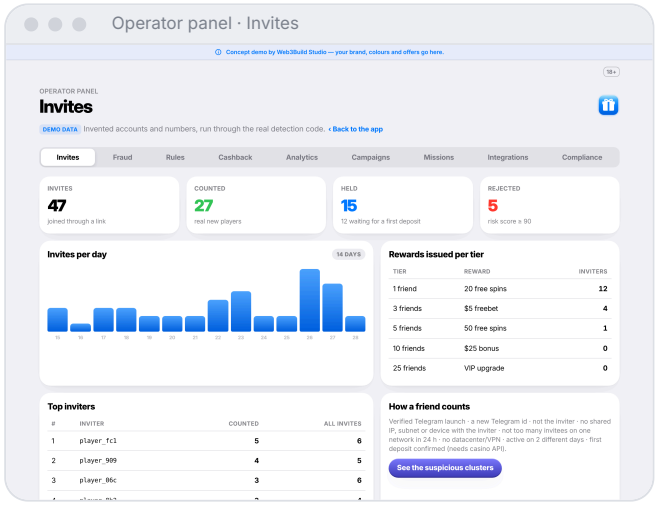
Bot users per day, opt-in rate, D1/D7/D30 cohorts. **Demo data**



Segments, A/B split, player-local send time. **Demo data**



Loss cashback: send a code in the bot, with guardrails. **Demo data**



Invites per day, rewards per tier, top inviters. **Demo data**

Campaigns

Segments (new, VIP, inactive 7 days, language, country), A/B variants with a split, send time in the player's own time zone, quiet hours, previews in EN/PT/ES/TR.

One-tap win-back

The cashback view lists players with net losses and their cashback; one button sends the code in the bot, only to players the guardrails allow.

Integrations

Telegram Login → casino account linking, affiliate postbacks and CRM events by webhook, with the event list the bot emits.

Ready, needs your keys

SAFETY & FAIRNESS

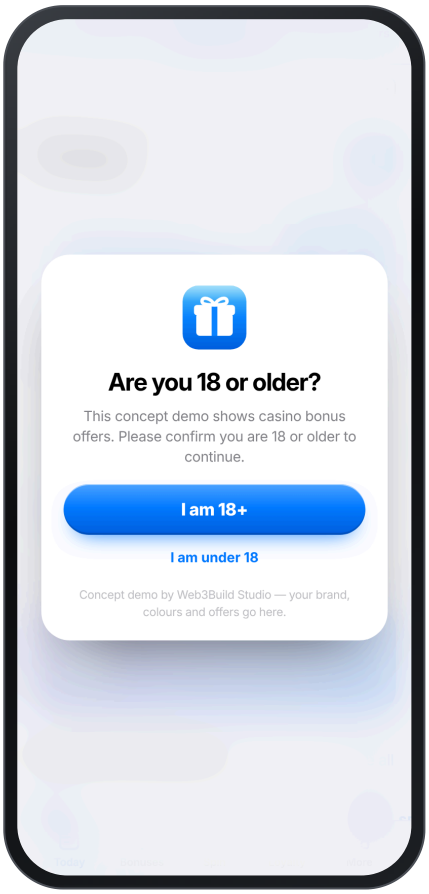
Built to stop abuse and protect players.

Multi-account and cluster detection

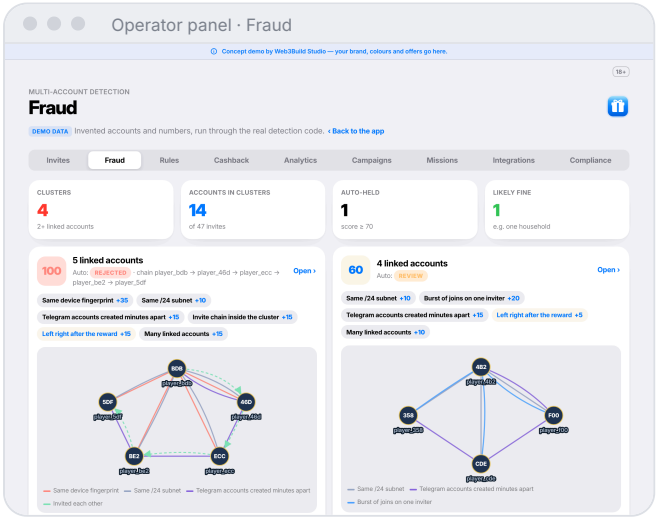
- Accounts are linked by shared **IP, /24 subnet, device and wallet hashes**, Telegram ids created minutes apart and bursts of sign-ups on one inviter; invite chains are followed.
- Each cluster gets a **risk score 0–100 with the reasons**; rules set the auto-hold and auto-reject lines, max accounts per IP, minimum account age, datacenter/VPN = hold, reward only after a first deposit.
- **No raw IPs are stored**: only salted hashes of the IP and its subnet and a device hash, deleted 90 days after the last visit.
- Telegram's signed launch data (initData) is **verified with the bot token** before an invite is recorded.

Responsible-gambling guardrails on cashback

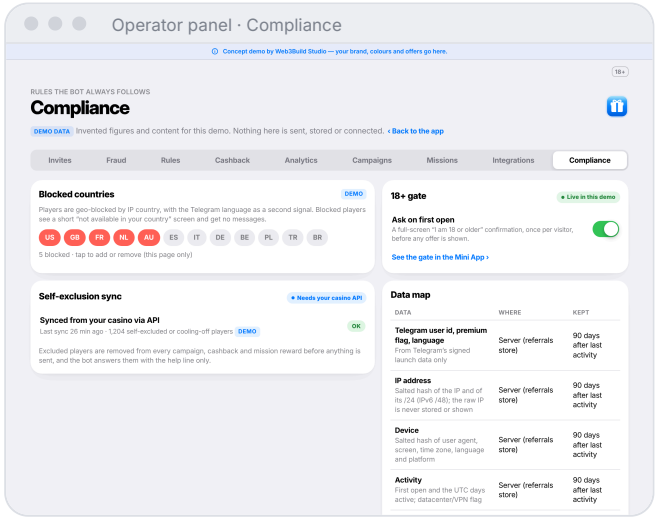
- Self-excluded, at-risk (RG-flagged) and opted-out players never receive an offer.
- 7-day cooldown per player, weekly cap, daily budget.
- No sends 00:00–07:00 in the player's time; every message carries the 18+ line and **/stop**.



18+ gate on first open



Linked-account clusters with score and reasons. **Demo data**



Blocked countries, 18+ gate, self-exclusion sync, data map. **Demo data**

The bot never asks for a casino password, 2FA code, seed phrase or deposit. A message that looks like one is answered with a warning and is neither echoed nor stored.

HOW IT WORKS

Your brand on a working product.

The bot is configured per brand: colours, logo mark, official domain, offers, wheel prizes, loyalty tiers, invite tiers and footer lines. Light and dark follow Telegram.

1. **Try it live**
   Open @Demovipbonusbot in Telegram: the full showcase runs there, no code needed. Your team can click through every screen.
2. **Your brand**
   You send colours, logo, official links, offers and the rewards you want. We configure your bot and Mini App.
3. **Your bot in Telegram**
   You create the bot in @BotFather; the token is pasted once in the panel, checked with Telegram and stored sealed. Connect sets the webhook, commands and menu button.
4. **Connect your casino API**
   Features marked “Needs your casino API” (account link, cashback on net losses, withdrawal status, deposit analytics, self-exclusion sync) are switched on with your keys.

WHAT YOU GET

- **Custom design included**: your brand, colours, logo, domain and screens, designed for you in every build.
- **A Mini App** in your brand: Today, Bonuses, Spin, Loyalty, Safety, Check-in, Invite, Missions.
- **Referral fraud detection** with clusters, risk scores and rules.
- **Operator panel**: analytics, campaigns, missions, integrations, compliance.
- **Data map** and a plain DPA-style summary of what is stored.
- **A Telegram bot** with welcome card, commands, alerts opt-in and /stop.
- **Broadcasts** with preview and confirm, paced under Telegram’s limits, blocked chats removed.
- **Cashback with guardrails** (needs your casino API for net losses).
- **18+ gate**, country blocks and an audit log.

Timeline and price depend on the features and integrations you choose; we state both in the quote.
